SUMMARY

Final-year B.Des UI/UX Design student at Symbiosis Institute of Design with experience in user research, interaction design, prototyping, usability testing and design systems. Delivered four user-centered projects across phygital, accessibility, health and craft domains. Completed a two-month UI/UX internship at Tata Motors, co-creating a 30+ component design system and a 20+ screen internal AI chatbot with developers.

SKILLS

UX Research: User Research · User Interviews · Usability Testing · Personas · Journey Mapping · Card Sorting · Contextual Inquiry

Product & Interaction Design: Information Architecture · User Flows · Wireframing · Prototyping · Interaction Design · Responsive Design · Design Systems · Visual Design

Tools: Figma · Adobe Illustrator · Adobe Photoshop · Adobe Premiere Pro · Miro · PowerPoint · Notion

WORK EXPERIENCE

UI/UX Design Intern, Tata Motors Passenger Vehicles Ltd.

May 2026 – Jun 2026 | Pune, Maharashtra

- Co-created a design system of 30+ reusable UI components with a front-end developer, enabling consistent CSS implementation.
- Designed the end-to-end UI for an internal AI chatbot, delivering 20+ screens and components from user flows to high-fidelity UI.
- Established the chatbot's visual identity, including its logo, icon set, color palette and supporting visual assets.
- Partnered with developers and stakeholders through design handoff to align UI specifications with implementation.

Service Learning, Poornam Ecovision Foundation

Dec 2025 – Feb 2026 | Pune, Maharashtra

- Curated and laid out a product catalogue showcasing the NGO's 40+ product range to support its promotional activities.
- Photographed and edited 100+ products for the catalogue, maintaining a consistent visual style.
- Supported product stalls, product displays and on-ground promotional activities.
- Produced 3+ promotional reels to showcase products and strengthen the NGO's social media presence.

SELECTED WORKS

Little Roots - Phygital Product Design

Aug 2026 – Oct 2026

- Built a phygital gardening experience for children aged 5–12, pairing a planting kit with an iPad app.
- Designed child-friendly interfaces with 50+ screens for plant monitoring, guided watering, leaf scanning, growth tracking and garden customization.
- Tailored the app experience to two age groups (5–8 and 9–12) and integrated the kit and app into one plant-care journey.
- Evaluated usability with 5 children aged 5–12 through think-aloud sessions and the System Usability Scale. Achieved SUS score of 72.5 .

Mentora - UX Research & Product Design

Dec 2025 – Feb 2026

- Investigated accessibility barriers in career guidance for people with Colour Vision Deficiency (CVD) through user research.
- Conceptualized a career guidance platform that maps professions by colour dependency and accessibility needs.
- Defined core features, including career assessments, mentor booking and an e-library.
- Mapped user flows, built interactive prototypes from wireframes and validated the experience through usability testing.

Hormona - UX Research & Product Design

Jul 2025 – Oct 2025

- Researched awareness gaps in perimenopause and postpartum health.
- Crafted a health-tracking app covering mood, nutrition, exercise, medication, menstrual cycles and baby milestones.
- Explored personalized diet and fitness recommendations informed by behavioral insights and health data.
- Turned research insights into wireframes and high-fidelity prototypes, and evaluated the proposed concept.

Paithani Craft Documentation - Research & Design

May 2025 – Jul 2025

- Documented traditional Paithani weaving practices, artisan workflows, audiences and market context through field research in Yeola.
- Identified challenges faced by artisans, including power-loom competition, limited awareness and financial constraints.
- Delivered a craft documentation website concept that communicates authenticity and supports informed purchase decisions.
- Proposed a direct-buying model connecting customers with artisans.
